Other Special Services

End of Life Care: End of life care is care given to people who are near the end of life and have chosen to stop treatment to cure or control their disease. End-of-life care includes physical, emotional, social, and spiritual support for patients and their families. The goal of end-of-life care is to control pain and other symptoms so the patient can be as comfortable as possible. End-of-life care may include palliative care, supportive care, and hospice care.

Respite Care: Respite care is an option for temporary care in a long-term care community. Typically, the person is receiving care at home and the person's caregivers need a temporary break from caregiving. Respite is always time-limited and the person would return home after the designated time. This is often the perfect solution for families seeking a comfortable home-away-from-home for a loved one when out of town or preparing for a holiday. Through our Respite Care services, you or a loved one will have the opportunity to meet new people with similar experiences and enjoy fun activities, all while being cared for in a safe and friendly environment.
