

Your Path to Possible

Our Skilled and Caring Team

We treat the whole person. Every member of our team knows that meeting your goals hinges on how we care about you as well as how we care for you and provide the treatment you need. Our goal is to understand you as a person and create a space where you can thrive. Our team includes two physicians on site two days a week each and a Transitional Care Manager will serve as a single point of contact for you and your family members and coordinates your care from admission to after discharge.

We know that your recovery is about more than your treatment. It's about us taking the time to know you, your goals, and what motivates you; and then creating an individual care experience for you.

Caring

Our Transitional Care Services team views caring as a calling; how we treat you as an individual is just as important as the health care we provide. You will benefit from our not-for-profit distinction that gives us the freedom to get to know you and concentrate on your needs. We strive to provide personal attention with your care and goals in mind without complicating the process.

Convenience

We accept Medicare and a wide range of private insurance plans. Our team members can verify your benefits, help streamline admission, and coordinate your transition from hospital to Transitional Care Services at Westminster Village. We can conduct a home visit to identify any equipment or modifications that may be needed to help make your return home safe and comfortable. In addition, we are able to accept admissions from home or doctor's office with a physician's order.

How We Can Help

Many people need additional therapy and care as they leave the hospital but are not quite ready to go home. Transitional Care Services at Westminster Village is your path to possible. Our caring team is here to help you meet your personal wellness and activity goals and get you back to your life and your home.

Our clinical services are comprehensive and include: wound management, pain management, post stroke, post surgical and joint replacement rehabilitation as well as many additional specialized care capabilities.

Amenities that Complement *Your Path to Possible*

- Accommodations are in place to support your technology needs
- Ability to provide any necessary diagnostic studies on-site
